Detailed Action

1.) The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2.) Claims 87-91 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 87 is an apparatus claim, but it depends from method claim 80, making it unclear what the scope of claim 87 is. Claims 88-91 are inadequate under 35 USC 112 in that they depend from claim 87.

3.) The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4.) Claims 1-9, 11-19, and 21-34 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-36 of U.S. Patent No. 6,329,636 (cited by applicant) taken with Church et al. (6,023,037, cited by applicant) or over claims 1-35 of U.S. Patent No. 6,815,639 taken with Church et al. (6,023,037, cited by

Art Unit: 1725

applicant). Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to have provided the claimed subject matter of either patent 6,329,636 or 6,815,639 with power factor correction as claimed in view of the teachings of Church et al. (6,023,037) that such is advantageous in a switching mode welding power supply (see element 20 in Church et al. (6,023,037) and the discussion thereof).

5.) Claims 37-98 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-36 of U.S. Patent No. 6,329,636 (cited by applicant) or over claims 1-35 of U.S. Patent No. 6,815,639. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are broader than the patented claims and are therefore obvious thereover.

6.) If applicant files a terminal disclaimer to overcome the obviousness type double patenting rejections above, he is reminded that he must disclaim both patents nos. 6,329,636 and 6,815,639.
